CONTENTS OF VOLUME 37

NUMBER 1, 14 OCTOBER 1968

JAVAHERIAN, K. and BEYCHOK, S., Subunit Interactions in the Conformational Change of Horse Apohemoglobin on Binding of Hemin 1

OPSCHOOR, A., POUWELS, P. H., KNIJNENBURG, C. M. and ATEN, J. B. T., Viscosity and Sedimentation of Circular Native Deoxyribonucleic Acid . 13

RHOADES, M., MACHATTIE, L. A. and THOMAS, C. A., JR., The P22 Bacteriophage DNA Molecule. I. The Mature Form 21

RHOADES, M. and THOMAS, C. A., JR., The P22 Bacteriophage DNA Molecule. II. Circular Intracellular Forms 41

MORGAN, A. R. and WELLS, R. D., Specificity of the Three-stranded Complex Formation between Double-stranded DNA and Single-stranded RNA containing Repeating Nucleotide Sequences 63

VIELMETTER, W., BONHOEFFER, F. and SCHÜTTE, A., Genetic Evidence for Transfer of a Single DNA Strand during Bacterial Conjugation . . 81

BERNARDI, G. and BACH, M-L., Inactivation of *Haemophilus influenzae* Transforming DNA by Spleen Acid Deoxyribonuclease 87

Appendix—Estimation of the Ratio of Total Bonds broken to Bonds broken by Diplotomic Degradation in Native DNA digested by Spleen Acid DNase 97

CASKEY, C. T., BEAUDET, A. and NIRENBERG, M., RNA Codons and Protein Synthesis. 15. Dissimilar Responses of Mammalian and Bacterial Transfer RNA Fractions to Messenger RNA Codons 99

SCHLEIF, R. F., Origin of Chloramphenicol Particle Protein 119

SMITH, H. S. and PIZER, L. I., Abortive Infection of *Escherichia coli* Strain W by T2 Bacteriophage 131

SCHNEIDER-BERNLOEHR, H., LOHRMANN, R., SULSTON, J., WEIMANN, B. J., ORGEL, L. E. and MILES, H. T., Non-enzymic Synthesis of Deoxyadenylate Oligonucleotides on a Polyuridylate Template 151

CATO, A., JR. and GUILD, W. R., Transformation and DNA Size. I. Activity of Fragments of Defined Size and a Fit to a Random Double Cross-over Model 157

Appendix—LACKS, S., Theoretical Relationship between Probability of Marker Integration and Length of Donor DNA in Pneumococcal Transformation 179

Pratt, D. and Erdahl, W. S., Genetic Control of Bacteriophage M13 DNA Synthesis 181

Tsugita, A. and Inouye, M., Complete Primary Structure of Phage Lysozyme from *Escherichia coli* T4 201

Inouye, M. and Tsugita, A., Amino Acid Sequence of T2 Phage Lysozyme . 213

Richards, F. M., The Matching of Physical Models to Three-dimensional Electron-density Maps: A Simple Optical Device 225

Letters to the Editor—

Richards, F. M. and Knowles, J. R., Glutaraldehyde as a Protein Cross-linking Reagent 231

Migchelsen, C., Berendsen, H. J. C. and Rupprecht, A., Hydration of DNA. Comparison of Nuclear Magnetic Resonance Results for Oriented DNA in the *A*, *B* and *C* Form. 235

McGavin, S., Interallelic Complementation and Allostery . . . 239

Erratum 243

Announcement 244

Number 2, 28 October 1968

Forchhammer, J. and Kjeldgaard, N. O., Regulation of Messenger RNA Synthesis in *Escherichia coli* 245

Edlin, G., Stent, G. S., Baker, R. F. and Yanofsky, C., Synthesis of a Specific Messenger RNA during Amino Acid Starvation of *Escherichia coli* 257

Lavallé, R. and De Hauwer, G., Messenger RNA Synthesis during Amino Acid Starvation in *Escherichia coli* 269

Stubbs, J. D. and Hall, B. D., Level of Tryptophan Messenger RNA in *Escherichia coli* 289

Stubbs, J. D. and Hall, B. D., Effects of Amino Acid Starvation upon Constitutive Tryptophan Messenger RNA Synthesis 303

Ishida, T. and Sueoka, N., Elimination of Magnesium Ions as an Absolute Requirement for the Native Conformation of Tryptophan Transfer Ribonucleic Acid 313

Bálint, M., Szilágyi, L., Fekete, Gy., Blazsó, M. and Biró, N. A., Studies on Proteins and Protein Complexes of Muscle by Means of Proteolysis. V. Fragmentation of Light Meromyosin by Trypsin 317

ROME, E., X-ray Diffraction Studies of the Filament Lattice of Striated Muscle in Various Bathing Media 331

ENOKI, Y., MAEDA, N., SANTA, M. and TOMITA, S., Properties of Isolated Active γ^F Subunits of Foetal Haemoglobin 345

EISENBERG, H. and COHEN, G., An Interpretation of the Low-angle X-ray Scattering of DNA Solutions 355

LETTER TO THE EDITOR

WRIGHT, H. T., KRAUT, J. and WILCOX, P. E., Comparison of the π-, δ- and γ-Chymotrypsin Family with α-Chymotrypsin . . . 363

NUMBER 3, 14 NOVEMBER 1968

BRUSKOV, V. I. and KISELEV, N. A., Electron Microscope Study of the Structure of *Escherichia coli* Ribosomes and CM-like Particles 367

LAVER, W. G., PEREIRA, H. G., RUSSELL, W. C. and VALENTINE, R. C., Isolation of an Internal Component from Adenovirus Type 5 379

COHEN, S. N. and HURWITZ, J., Genetic Transcription in Bacteriophage λ: Studies of λ mRNA Synthesis *in vivo* 387

SPARLING, P. F., MODOLELL, J., TAKEDA, Y. and DAVIS, B. D., Ribosomes from *Escherichia coli* Merodiploids Heterozygous for Resistance to Streptomycin and to Spectinomycin 407

GOMATOS, P. J., Reovirus-specific, Single-stranded RNA's synthesized *in vitro* with Enzyme purified from Reovirus-infected Cells 423

NISHI, Y., YOSHIDA, T. O. and TAKESUE, Y., Electron Microscope Studies on the Structure of Rabbit Intestinal Sucrase 441

KALLENBACH, N. R., Theory of Thermal Transitions in Low Molecular Weight RNA Chains 445

ISHIWA, H. and TESSMAN, I. Control of Host DNA Synthesis after Infection with Bacteriophages S13 and ϕ X174 467

KANO-SUEOKA, T. and SUEOKA, N., Characterization of a Modified Leucyl-tRNA of *Escherichia coli* after Bacteriophage T2 Infection 475

BERNARDI, G., CARNEVALI, F., NICOLAIEFF, A., PIPERNO, G. and TECCE, G., Separation and Characterization of a Satellite DNA from a Yeast Cytoplasmic "Petite" Mutant 493

HUXLEY, H. E., Structural Difference between Resting and Rigor Muscle; Evidence from Intensity Changes in the Low-angle Equatorial X-ray Diagram 507

LETTERS TO THE EDITOR

RUPLEY, J. A. and BRUICE, T. C., Conversion of Skeletal Models to Space-filling 521

STEINBERG, R. A. and DENHARDT, D. T., Inhibition of Synthesis ϕX174 DNA in a Mutant Host Thermosensitive for DNA Synthesis . 525

CIFERRI, O., PARISI, B., PERANI, A. and GRANDI, M., Different Specificity of Yeast Transfer Enzymes for *Escherichia coli* Ribosomes . . 529

ERRATA 535

Index to Volume 37

Adenovirus type 5, isolation of an internal component, 379
Allostery, and interallelic complementation, 239
Amino acid sequence of T2 phage lysozyme, 213
— — starvation, effects on constitutive tryptophan mRNA synthesis, 303
— — — of *Escherichia coli*, synthesis of mRNA, 257, 269
Apohaemoglobin, horse, conformational change on binding of haemin, 1
Aten, J. B. T. (see also Opschoor, A.), 13

Bach, M. L. (see also Bernardi, G.), 87
Bacterial conjugation, genetics of transfer of a single DNA strand, 81
Bacteriophage λ, genetic transcription, 387
— M13, DNA synthesis, genetic control, 181
— P22, DNA molecule, 21, 41
— φX174, control of host DNA synthesis after infection, 467
— S13, control of host DNA synthesis after infection, 467
— T2, abortive infection of *Escherichia coli* strain W, 131
— —, amino acid sequence, 213
— — infection of *Escherichia coli* producing a modified leucyl-tRNA, 475
Baker, R. F. (see also Edlin, G.), 257
Bálint, M., Szilágyi, L., Fekete, Gy., Blazsó, M. & Biró, N. A., Studies on proteins and protein complexes of muscle by means of proteolysis. V. Fragmentation of light meromyosin by trypsin, 317
Beaudet, A. (see also Caskey, C. T.), 99
Berendsen, H. J. C. (see also Migchelsen, C.), 235
Bernardi, G. & Bach, M. L., Inactivation of *Haemophilus influenzae* transforming DNA by spleen acid deoxyribonuclease, 87
—, Carnevali, F., Nicolaieff, A., Piperno, G. & Tecce, G., Separation and characterization of a satellite DNA from a yeast cytoplasmic "petite" mutant, 493
Beychock, S. (see also Javaherian, K.), 1
Biró, N. A. see also Bálint, M.), 317
Blazsó, M. (see also Bálint, M.), 317
Bonhoeffer, F. (see also Vielmetter, W.), 81
Bruice, T. C. (see also Rupley, J. A.), 521
Bruskov, V. I. & Kiselev, N. A., Electron microscope study of the structure of *Escherichia coli* ribosomes and CM-like particles, 367

Carnevali, F. (see also Bernardi, G.), 493
Caskey, C. T., Beaudet, A. & Nirenberg, M., RNA codons and protein synthesis. 15. Dissimilar responses of mammalian and bacterial tRNA fractions to mRNA codons, 99
Cato, A., Jr. & Guild, W. R., Transformation and DNA size. I. Activity of fragments of defined size and a fit to a random double cross-over model, 157
Chloramphenicol particle protein, 119
Chymotrypsins, π-, δ- and γ-, comparison with α-chymotrypsin, 363
Ciferri, O., Parisi, B., Perani, A. & Grandi, M., Different specificity of yeast transfer enzymes for *Escherichia coli* ribosomes, 529
CM-like particles, *Escherichia coli*, electron microscope study, 367
Cohen, G. (see also Eisenberg, H.), 355
Cohen, S. N. & Hurwitz, J., Genetic transcription in bacteriophage λ: studies of λ mRNA synthesis *in vivo*, 387
Complementation, interallelic, and allostery, 239
Conjugation, bacterial, genetics of transfer of a single DNA strand, 81
Cross-linking reagent, protein, use of glutaraldehyde, 231

Davis, B. D. (see also Sparling, P. F.), 407
De Hauwer, G. (see also Lavallé, R.), 269

Denhardt, D. T. (see also Steinberg, R. A.), 525
Deoxyribonucleic acid, circular native, its viscosity and sedimentation, 13
— —, donor, probability of marker integration and length, in pneumococcal transformation, 157
— —, double-stranded, complex formation with single-stranded RNA, 63
— — molecule, P22 bacteriophage, 21, 41
— —, oriented, nuclear magnetic resonance results, 235
— —, ϕX174, inhibition of synthesis in a mutant host thermosensitive for DNA synthesis, 525
— —, satellite, from a yeast cytoplasmic "petite" mutant, 493
— —, size and transformation, 157
— — solutions, low-angle X-ray scattering, 355
— — synthesis in bacteriophage M13 DNA, genetic control, 181
— — — —, host, after infection with bacteriophages S13 and ϕX174, 467
— —, transforming, of *Haemophilus influenzae*, inactivation by spleen acid deoxyribonuclease, 87

Edlin, G., Stent, G. S., Baker, R. F. & Yanofsky, C., Synthesis of a specific mRNA during amino acid starvation of *Escherichia coli*, 257
Eisenberg, H. & Cohen, G., An interpretation of the low-angle X-ray scattering of DNA solutions, 355
Electron-density maps, three-dimensional, matching of physical models, 225
— microscope studies on the structure of rabbit intestinal sucrase, 441
— — study of the structure of *Escherichia coli* ribosomes and CM-like particles, 367
Enoki, Y., Maeda, N., Santa, M. & Tomita, S., Properties of isolated active γ^F subunits of foetal haemoglobin, 345
Erdahl, W. S. (see also Pratt, D.), 181
Escherichia coli, level of tryptophan mRNA, 289
— —, mRNA synthesis in, 245, 269
— —, modified leucyl-tRNA after bacteriophage T2 infection, 475
— — ribosomes and CM-like particles, electron microscope study, 367
— — —, different specificity of yeast transfer enzymes, 529
— — — from merodiploids, 407
— — strain W, abortive infection with T2 bacteriophage, 131
— — T4, structure of phage lysozyme, 210
— —, synthesis of a specific mRNA during amino acid starvation, 257
